CONTENT OVERVIEW

This booklet provides an overview of the Global Health Program at Weill Cornell, including information on the curriculum, global health faculty, and extracurricular global health programs.

Office of Global Health Education	3
Center for Global Health	4
Global Health Opportunities Pathway	5
List of Faculty Involved in Global Health Research	6
Profiles of Faculty Involved in Global Health Research	11
Global Health Applied Experiences and Projects	34
Global Health Curriculum Components	47
Certificate in Global Health	49
Global Health Student Groups	50

OFFICE OF GLOBAL HEALTH EDUCATION

For over fifty years, Weill Cornell faculty members have been actively involved in research and clinical medicine in both developed and resource-poor countries. The medical college's **Office of Global Health Education (OGHE)** oversees and coordinates the global health educational electives program for Weill Cornell medical students as well as for visiting international medical students who wish to participate in a clinical elective at Weill Cornell. OGHE was established by the Dean to administer global health education activities that now include international clinical electives placements and a global health education curriculum.

OGHE's mission is to provide Weill Cornell students with information and counseling about study opportunities abroad (clinical, research, community health), to facilitate referral to Weill Cornell faculty mentors and sponsors in host countries, and to increase endowment funding to permit any Weill Cornell medical student who wishes to take an international elective to do so. As part of its mission, OGHE views itself as a vehicle for capacity building with global partners. Towards this effort, OGHE has formed formal and informal agreements with medical colleges around the world.

Global Health Opportunities Abroad

Weill Cornell provides opportunities for medical students to better understand global health challenges through mentored research and clinical experiences abroad. As an effort to continue to expand the global health curriculum, OGHE works with students and faculty to identify sites and projects around the world and assesses each for academic rigor and value to our program. For all students who plan to work on **research projects involving human subjects**, IRB approval must be obtained. Students should ask the research mentor to add his/her name to the mentor's IRB protocol. Students are not allowed to submit their own IRB proposal to the WCM IRB. The faculty mentor must serve as PI on the IRB. Further, students are required to take the CITI IRB training course. Students working on projects that do not have IRB approval will not be able to present or publish the findings. Students can participate in projects over the summer between their first and second year, during their AOC Scholarly Project dedicated time, and in a year off between third and fourth year. Students interested in doing a project abroad must meet with their faculty mentor to discuss potential projects as well as with the Director of OGHE .

To learn about opportunities abroad and explore the global health projects undertaken by our students, visit our [Project Map Database](#).

Global Health Curriculum (GHC)

The GHC is a faculty-student-run elective that spans the four years of medical school. The curriculum includes course modules, a preceptorship program, mentorship, and opportunities for projects abroad. Students may participate in as many parts of the curriculum as they like, and have the opportunity to earn a Certificate in Global Health. Please see page 5 for an overview of the curricular components.

Certificate in Global Health

The purpose of the Certificate in Global Health is to recognize students who have dedicated significant hours to the field of global health through meaningful engagement with the global health program curriculum throughout medical school. This certificate is awarded upon graduation to any student who has met the requirements. Please see page 43 for more information regarding the Certificate in Global Health.

Global Health Area of Concentration (AOC)

The Global Health AOC is designed to prepare WCM students to be future leaders in global health through a longitudinal elective program featuring didactic course work, experiential learning, and a mentored pathway for a career in global health. Students may declare their interest in the Global Health AOC, by participating in many aspects of the Global Health Curriculum. Students who wish to do their Scholarly Project abroad may do so under the mentorship of a Weill Cornell and host mentor. The process of selecting a mentor for the project to be carried out abroad is the same as that listed in the AOC website. For more information on the Global Health AOC, please contact Global Health AOC leaders, Dr. Madelon Finkel at maf2011@med.cornell.edu or Dr. Daniel Fitzgerald at dwf2001@med.cornell.edu.

Global Health Diplomacy Area of Concentration (AOC)

This AOC will provide an overview of the US Government's mission to work with academic medical centers to develop policies and programs aimed at assisting resource-restrained countries in order to prevent the spread of infectious diseases and to manage the threat of non-communicable diseases. In addition, students will learn about the "tradecraft" side of global health diplomacy in order to appreciate the role of health organizations in their efforts to combat disease. Students will learn how to approach government-to-government negotiations involving bilateral or multi-lateral science agreements related to the global burden of disease. The development of health technology innovations as a tool to managing global health goals and solutions will be emphasized as they relate to science diplomacy. For more information on the Global Health Diplomacy AOC, please contact Dr. David P. Hajjar at dphajjar@med.cornell.edu.

Center for Global Health

Overview

The Center for Global Health serves Weill Cornell Medical College and Cornell University in fostering the goals of its current NIH Global Health Network. The Center, based in the Department of Medicine, has NIH-funded programs in Brazil, Haiti, Tanzania, and India, focusing on HIV/AIDS, TB, and infectious disease research. See <https://globalhealth.weill.cornell.edu/about-us/global-health-weill-cornell-and-cornell-university> or reach out to Daniel Fitzgerald, MD (dwf2001@med.cornell.edu) for more information.

FACULTY INVOLVED IN GLOBAL HEALTH RESEARCH

Faculty Name	Specialty/Research Interest
Josyann Abisaab, MD, FACEP Assistant Professor of Clinical Medicine	Emergency Medicine; Refugee Health
Ana Alzaga Fernandez, MD Assistant Professor in Ophthalmology	Ophthalmology
Ramin Asgary, MD, MPH Associate Attending Physician Clinical Associate Professor of Medicine	Internal Medicine
Jason Baker, MD Assistant Professor of Clinical Medicine	Diabetes
Onyinye Balogun, MD Assistant Professor of Radiation Oncology	Delivery of Radiation Therapy
Eric Brumberger, MD Program Director, Department of Anesthesiology	Anesthesiology
Adeel Ajwad Butt, MD [Qatar] Professor of Medicine Hamad Medical Corporation	Hepatitis
Kirk Deitsch, PhD Professor of Microbiology and Immunology	Malaria
Randi Diamond, MD Assistant Professor of Medicine	Geriatrics and Palliative Medicine
Jennifer A. Downs, MD, PhD [Tanzania] Assistant Professor of Medicine Center for Global Health	HIV and Schistosomiasis
Kathryn Dupnik, MD [Brazil, Haiti] Assistant Professor of Medicine Center for Global Health	Leprosy
Sabine Ehrt, PhD Professor of Microbiology and Immunology	Tuberculosis
Ernie Esquivel, MD Medicine Clerkship Director Assistant Professor of Clinical Medicine	Nephrology
Oliver Fein, MD Professor of Clinical Healthcare Policy and Research, Professor of Clinical Medicine Associate Dean of Affiliations	Health System Reform; Comparative Health Systems
Madelon L. Finkel, PhD Professor of Clinical Healthcare Policy and Research Director, Office of Global Health Education	Healthcare Policy; Women's Health Issues; Global & Public Health

<p>Joseph J. Fins, MD, MACP, FRCPa The E. William Davis, Jr. M.D. Professor of Medical Ethics and Chief of the Division of Medical Ethics</p>	Bioethics; Neuroethics; Psychiatry
<p>Daniel W. Fitzgerald, MD Professor of Medicine, Immunology and Microbiology Director, Center for Global Health</p>	Global Health; Infectious Disease
<p>James Gallagher, MD Associate Professor of Clinical Surgery Director, William Randolph Hearst Burn Center</p>	International surgery; Burn Care
<p>Alfred C. Gellhorn, MD Associate Professor of Rehabilitation Medicine</p>	Sports Rehabilitation; Rehabilitation Medicine
<p>Marc Goldstein, MD, DSc (hon), FACS Matthew P. Hardy Distinguished Professor of Reproductive Medicine and Urology</p>	Global Health; HIV; Urology
<p>Linnie M Golightly, MD Associate Professor of Clinical Medicine</p>	Malaria
<p>Laura Greisman, MD Assistant Attending Physician Assistant Professor of Clinical Medicine</p>	Global Health; Internal Medicine
<p>David P. Hajjar, PhD Professor of Pathology and Laboratory Medicine</p>	Global Health Diplomacy
<p>Roger Härtl, MD Professor of Neurological Surgery Director of Spinal Surgery and Neurotrauma Director of Center for Comprehensive Spine Care</p>	Neurosurgery
<p>Duncan Hau, MD Assistant Professor of Pediatrics</p>	Pediatrics
<p>Caitlin Hoffman, MD Assistant Professor of Neurosurgery</p>	Neurosurgery
<p>Kevin Holcomb, MD, FACOG Associate Professor of Clinical Obstetrics and Gynecology</p>	Gynecologic Oncology
<p>Thanakorn Jirasevijinda, MD Associate Professor of Pediatrics</p>	Pediatrics
<p>Warren D. Johnson, Jr., MD Professor of Medicine; Founding Director, Center for Global Health</p>	Global Health; Infectious Disease
<p>Christine Joyce, MD Assistant Professor of Pediatrics in the Division of Pediatric Critical Care Medicine</p>	Pediatric Critical Illness
<p>Björn F. C. Kafsack, PhD, MHS Assistant Professor in Microbiology & Immunology</p>	Malaria

Selin Somersan-Karakaya, MD, Assistant Professor of Medicine	Tuberculosis
Gunisha Kaur, MD, MA Assistant Professor of Anesthesiology Director, Anesthesiology Global Health Initiative	Anesthesiology; Chronic Pain in Survivors of Torture
Justin Kingery, MD, PhD [Tanzania] Instructor in Medicine Center for Global Health	Infectious Diseases; Cardiovascular Disease
Dr. Richard Lee, MD, MBA Program Director for the Urology department	Urology; HIV
Philip S. Li, MD Professor of Research in Urology Professor of Research in Reproductive Medicine	Urology; Reproductive Medicine; HIV
Jyoti Mathad, MD Assistant Professor of Medicine Center for Global Health	Tuberculosis
Jeffery F. McMahon Assistant Attending Ophthalmologist Assistant Professor of Ophthalmology	Ophthalmology
Molly McNairy, MD, MSc Assistant Professor of Medicine Center for Global Health	Women's Health; HIV; Cardiovascular Disease; Slum Health
Estomih Mtui, MD Professor of Anatomy in Radiology Professor of Anatomy in Cell and Developmental Biology	Anatomy; Neuro-Radiology
Henry Wilke Murray, MD Professor of Medicine Arthur R. Ashe Jr. Professor of Medicine Attending Physician	Infectious Disease
Carl Nathan, MD R.A. Rees Pritchett Professor and Chairman Microbiology and Immunology, Weill Cornell Medicine	Tuberculosis
Mayur Narayan, MD, MPH, MBA, MHPE, FACS, FCCM, FICS Attending Surgeon at Weill Cornell Medical Center in the Division of Trauma, Burns, Critical and Acute Care Surgery	Trauma; Burns; Critical and Acute Care Surgery
Douglas Nixon, MD, PhD Professor of Immunology in Medicine Chairman of Microbiology, Immunology & Tropical Medicine	HIV/AIDS
Oskana Ocheretina, PhD Assistant Professor of Microbiology in Medicine Center for Global Health	Global Health

<p>Jean W. Pape, MD [Haiti] Professor of Medicine Director, GHESKIO Center Center for Global Health</p>	Tuberculosis; HIV
<p>Robert N. Peck, MD, MS, DTM&H [Tanzania] Assistant Professor of Medicine and Pediatrics Center for Global Health</p>	Global Health
<p>Vivian Pender, MD Clinical Associate Professor of Psychiatry</p>	Global Mental Health; Human Trafficking; Human Rights
<p>Jeffrey Perlman, MB, ChB, Professor of Pediatrics</p>	Neonatal Global Health
<p>Paula Roy-Burman, MD, DTM&H Assistant Professor of Medicine</p>	Medical Education & Healthcare Delivery
<p>Kyu Y. Rhee, MD, PhD Associate Professor of Medicine & Microbiology & Immunology</p>	Tuberculosis; Infectious diseases
<p>David Scales, MD Assistant Professor of Medicine Hospital Medicine Clinical Scholar</p>	
<p>Bruce R. Schackman, PhD, MBA Distinguished Professor of Healthcare Policy & Research</p>	HIV & Adolescent Health in Haiti; Health Economics
<p>Dirk Schnappinger, PhD Associate Professor of Microbiology and Immunology</p>	Tuberculosis
<p>Art Sedrakyan MD, PhD Professor of Healthcare Policy and Research in Cardiothoracic Surgery</p>	Medical Device Epidemiology
<p>Joseph Shin, MD Assistant Professor of Medicine</p>	Survivors of Torture; Human Rights for Vulnerable Populations
<p>Matthew Simon, MD, MS Assistant Professor of Medicine, Infectious Disease Assistant Professor, Health Care Policy and Research</p>	Economic Analysis of Infectious Diseases
<p>Barry Smith, MD, PhD Professor of Clinical Surgery</p>	Problem Solving for Better Health
<p>Grace Sun, MD Assistant Professor of Ophthalmology Director of the Ophthalmology Clinical Practice</p>	Ophthalmology
<p>Radhika Sundararajan, MD, PhD Center for Global Health & Assistant Professor in Emergency Medicine</p>	HIV; Malaria; Health Behavior

Sheida Tabaie, MD Assistant Professor of Clinical Anesthesiology	Anesthesiology
Mary A. Vogler, MD Associate Professor of Clinical Medicine	Clinical HIV; HIV Clinical Trials; Infections in women and pregnancy
Kathleen Walsh, MD Instructor in Medicine Center for Global Health	Tuberculosis; Communicable Diseases

PROFILES OF FACULTY INVOLVED IN GLOBAL HEALTH RESEARCH

Josyann Abisaab, MD, FACEP, is a senior attending physician in the Emergency Department at the New York Presbyterian Hospital and faculty of the Global Emergency Medicine Program at Weill Cornell Medicine. Her areas of interest include global health, complex humanitarian emergencies, and refugee protection. She is also a Fellow at the Harvard FXB Center for Health and Human Rights, and has conducted human rights research and advocacy in the Syrian refugee camps in Jordan and Lebanon. She is currently involved in a research initiative in Lebanon with the International Committee of the Red Cross with a focus on health care access among host and refugee communities.

joa2011@med.cornell.edu

Ana Alzaga Fernandez, MD, graduated from the medical school of the Universidad Autonoma de Tamaulipas in Tampico, Mexico. She is an assistant professor of Ophthalmology at Weill Cornell Medicine. She provides comprehensive eye care and specializes in Cornea, Refractive and Cataract Surgery as a member of the Weill Cornell Eye Associates. She is highly committed to helping communities around the world through global health outreach efforts. She currently spearheads the department's Corneal Mission Program in Mauritius. Twice a year, WCM physicians travel to Mauritius to perform patient examinations and corneal transplantations while supporting local ophthalmologists through education and training.

Jason Baker, MD, is an Assistant Professor of Medicine and Attending Endocrinologist at Weill Cornell Medicine- New York Presbyterian. Dr. Baker is involved in numerous global health diabetes projects, and is the founder of the non-profit organization "Marjorie's Fund" (www.marjoriesfund.org), a type 1 diabetes global initiative dedicated to education, care, and research of type 1 diabetes in the developing world. Marjorie's Fund strives to support and improve diabetes care, education and research in resource poor settings with projects in Rwanda, Uganda, Ethiopia, India and New York City. Dr. Baker is also a member of Rwanda Type 1 Diabetes International Collaborators Group and the Insulin International Task Force. Other countries he has worked in include Qatar, UAE, Egypt, Haiti, Nicaragua, Guatemala, and the Republic of Georgia.

jcb2007@med.cornell.edu

Onyinye Balogun, MD, is an Assistant Professor of Radiation Oncology at Weill Cornell Medicine specializing in gynecologic and gastrointestinal malignancies. She is a graduate of Harvard University, and after a gap year spent in Nigeria conducting breast cancer research and advocacy, she enrolled in the Yale University School of Medicine. Dr. Balogun initiated her residency training at the University of Chicago and completed her final year at New York University. She has conducted and published breast cancer research in novel therapeutics for triple negative breast cancer and brain metastases. She is also engaged in hepatocellular cancer research as well as global health activities with a focus on improving the delivery of radiation therapy in low and middle income countries. She is currently spearheading initiatives in Armenia and Gabon on training for breast and gynecologic cancer care delivery.

onb9003@med.cornell.edu

Eric Brumberger, MD, is a board-certified Anesthesiologist specializing in regional and thoracic anesthesia. He earned a Bachelor of Arts Degree in Near Eastern Studies from Cornell University, and attended medical school at The Albert Einstein College of Medicine. Dr. Brumberger completed residency in Anesthesiology at New York-Presbyterian Hospital, Weill Cornell Medical College where he also was a fellow in regional and thoracic anesthesia. Dr. Brumberger spends most of his clinical time doing regional, thoracic, and obstetric anesthesia. He is proficient in ultrasound-guided nerve blocks and catheter placements of the upper and lower limbs as well as the trunk. He is very involved in medical student and resident education and is the Program Director for the Department of Anesthesiology. Dr. Brumberger has co-created innovative educational programming through both a Global Health Elective in Punjab, India and Rwanda and a course for undergraduates at Cornell in Ithaca, as well as an elective in Veterinary Anesthesiology at the Cornell University College of Veterinary Medicine.

erb9015@med.cornell.edu

Adeel Ajwad Butt, MD, MS, FACP, FIDSA, is a Professor of Medicine and Professor of Healthcare Policy and Research at Weill Cornell medicine. Dr. Butt's work, education, and training experience spans several countries over five continents. His areas of interest include Hepatitis C, antimicrobial resistance, antimicrobial prescription patterns, research capacity building and patient safety. He has been the recipient of numerous national and international awards, including a Fullbright Scholarship, Yale-Johnson and Johnson Award in International Health, a National Talent Pools Scholars Award and IDSA Training Faculty award to Africa, in addition to Excellence in Research Awards from various institutions in the US, the UAE, and Qatar. He has lectured extensively around the world and provided consultations to governmental and non-governmental organizations in building research, educational and training capacity in resource limited settings. He has published over 150 papers in high impact medical journals, and presented over 140 abstracts at major international conferences

aab2005@qatar-med.cornell.edu

Kirk Deitsch, PhD, is a Professor of Microbiology and Immunology. Dr. Deitsch is the director of the annual summer workshop on “The Cell Biology of Pathogens” organized by the American Society for Cell Biology and hosted by the University of Ghana in Accra, Ghana. The focus of Dr. Deitsch’s current research project is to understand how the malarial parasite, *Plasmodium falciparum*, regulates expression of the *var* gene family. Dr. Deitsch’s laboratory also studies how parasites generate diversity within these antigen encoding genes. Parasites isolated from different geographic regions typically have completely different *var* gene repertoires, thereby preventing their human hosts from generating an immune response that can recognize all parasites. Thus, *var* genes appear to be diversifying much more rapidly than the rest of the genome. This process of diversification involves frequent gene conversion events that are initiated by DNA double strand breaks. Dr. Deitsch has also initiated studies into how malaria parasites repair DNA double strand breaks and how the special chromatin structure found at *var* loci influences this process.

kwd2001@med.cornell.edu

Randi Diamond, MD, is an Assistant Professor of Medicine in Geriatrics and Palliative Medicine at Weill Cornell Medicine and New York Presbyterian Hospital. She is involved the development of creative educational programs as the Founding Director of the Liz Claiborne Center for Humanism in Medicine, and is an active clinician educator, practicing inpatient palliative medicine consultation and working with medical students, residents and fellows in palliative care, reflective practice and medical humanities. In addition, she is committed to her work in global health, traveling annually to rural Uganda to provide and teach palliative medicine. She serves on the NYPH Ethics Committee and is a faculty advisor to the WCMC student humanities journal, *Ascensus*.

rtd2002@med.cornell.edu

Jennifer A. Downs, MD, PhD, received her M.D. from Weill Cornell Medical College and her PhD in Parasitology from Leiden University (the Netherlands). She completed her Internal Medicine residency training at Columbia University College of Physicians and Surgeons, followed by her Infectious Diseases fellowship at New York-Presbyterian Hospital-Weill Cornell Medical College. Her research focuses on urogenital schistosomiasis and HIV susceptibility in women of reproductive age in Tanzania, where she has worked since 2007. Her research in Tanzania has been recognized by the Infectious Diseases Society of America Fellowship Award in International Infectious Diseases (2009), the Weill Cornell Department of Medicine Outstanding Junior Faculty Investigator Award (2011), a Bill and Melinda Gates Grand Challenges Explorations research grant (2014), an NIH/NIAID K23 Mentored Patient-Oriented Research Career Development Award (2014), a Gilead Sciences Research Scholars in HIV Award (2017), and an American Society for Clinical Investigation Young Physician-Scientist Award (2017).

jna2002@med.cornell.edu

Kathryn M. Dupnik, MD, is an Assistant Professor of Medicine. Dr. Dupnik received her M.D. from the University of Virginia and completed her clinical training in Internal Medicine at New York-Presbyterian Hospital – Columbia University Medical Center. She stayed in New York City to complete training in infectious diseases at New York-Presbyterian Hospital- Weill Cornell Medical College. Dr. Dupnik completed her fellowship research training in northeastern Brazil, where she conducted research on the pathologic immune reactions associated with *Mycobacterium leprae* infection. Dr. Dupnik's current research focuses on host-pathogen response in mycobacterial infections. She continues to study *M. leprae* infection, and is a co-investigator with the WCMC Tuberculosis Research Unit (TBRU) focusing on differential gene expression and macrophage infectivity by *M. tuberculosis* in different clinical presentations of TB.

kad9040@med.cornell.edu

Sabine Ehrt PhD, is a Professor of Microbiology and Immunology. She received her PhD from the University Of Erlangen, Germany. Her research group investigates the mechanism which *Mycobacterium tuberculosis* utilizes to establish and maintain chronic infections. The group currently focuses on mechanisms by which the pathogen evades or resists host-imposed stresses, proteins required for persistence *in vivo* and central carbon metabolism in *Mtb*. Dr. Ehrt is open to mentoring faculty, residents, and students who are interested in the research ongoing in her lab.

sae2004@med.cornell.edu

Ernie Esquivel MD, received his medical degree from the University of Virginia. He is board certified in internal medicine and nephrology. Prior to his career as a hospitalist, he conducted research on the genetic basis of renal diseases, including polycystic kidney disease and nephrotic syndrome. Dr. Esquivel is heavily engaged in the education of medical students and directs the third-year Internal Medicine core clerkship. He is interested in ways to optimize learning and has developed innovative methods of teaching communication skills, inter-professionalism and reflection to students. The formation of professional identity in young trainees is also an area of great interest to him. Dr. Esquivel received advanced training in medical education and faculty development at the Harvard Macy Institute and the Stanford Faculty Development Center. He has lectured nationally and internationally and has expanded his area of interest to global health education. For his commitment to education and mentorship of students, he has been recognized with several teaching awards

ere9022@med.cornell.edu

Oliver Fein, MD is a general internist whose work has focused on health system delivery reform on both the national and local levels. From 1993 to 1994, when he worked as a legislative assistant in the office of Senate Democratic Majority Leader, George Mitchell, he was involved with developing policy on healthcare benefits, graduate medical education, healthcare quality, public health, medical malpractice, antitrust and remedies and enforcements. On the local level, Dr. Fein has been concerned with access to healthcare for vulnerable populations and the role of the Academic Health Center. As Associate Dean for Affiliations at Weill Cornell Medical College, he is involved with diversifying the clinical and academic experiences for medical students through affiliations with hospitals and physicians who deliver health services to vulnerable populations. In addition, he is chair of the New York Metro chapter of Physicians for a National Health Program (PNHP), past President of national PNHP, and past Vice President for the United States of the American Public Health Association. Dr. Fein's health services research interests include health system reform and national health insurance. He has done work in ambulatory case-mix measurement, risk adjustment, different methods of measuring social class and health inequalities and comparing the role of primary care in health system reform in the United States and the United Kingdom. Internationally, he is interested in comparative health systems, with a particular interest in China.

ofein@med.cornell.edu

Madelon L. Finkel, PhD is a Professor of Healthcare Policy and Research as well as director of the Office of Global Health Education at the Weill Cornell Medical College in New York City. She is also course director in the Department of Healthcare Policy and Research and population sciences leader, area of concentration curriculum. Dr. Finkel earned her BA, MPA, and Ph.D. from New York University. She was a Visiting Professor at the School of Public Health, University of Sydney (Australia), in 2004, and in 2008 was named a Fulbright Senior Specialist awarded by The Fulbright Program. Dr. Finkel has been involved in epidemiological research and global health care policy studies over the past decades. Her current research focuses on a cervical cancer screening project in rural Tamil Nadu, India, as well as epidemiologic study of cervical cancer among inner city women in Lima, Peru. She is an acknowledged leading researcher on the global health impact of hydraulic fracturing. Dr. Finkel has served as consultant to numerous organizations, including law firms and pharmaceutical companies, in the areas of epidemiology, health care policy, and Public Health. She serves as Secretary of the Board of the Christian Medical College, Vellore (India).

maf2011@med.cornell.edu

Joseph J. Fins, MD, MACP, FRCP, graduated from Wesleyan University, and Cornell University Medical College. Dr. Fins is The E. William Davis, Jr. M.D. Professor of Medical Ethics and Chief of the Division of Medical Ethics at Weill Cornell Medical College where he is a Tenured Professor of Medicine, Professor of Medical Ethics in Neurology, Medical Ethics in Rehabilitation Medicine, Health Care Policy and Research, and Medicine in Psychiatry. His current interests include ethical and policy issues in brain injury and disorders of consciousness, civil and disability rights for individuals with severe brain injury, palliative care, research ethics in neurology and psychiatry, medical education, methods of ethics case consultation, the history of medicine, and bioethics in the Spanish-speaking world. He has been a visiting professor at universities in Spain and South America, and collaborated with the Pan American Health an elected member of the Royal National Academy of Medicine of Spain as an Academico de Honor. He is currently engaged with bioethics programs in Madrid and Barcelona, and has expansive connections with scholars in medical ethics around the world and collaborations with investigators in neuroethics and disorders of consciousness in Canada, Belgium, the U.K. and France.

jjfins@med.cornell.edu

Daniel W. Fitzgerald, MD, is a Professor of Medicine and Director, Center for Global Health. Dr. Fitzgerald trained in internal medicine and infectious diseases at the Massachusetts General Hospital. He conducts research and training in Haiti and Tanzania. His areas of interest include HIV/AIDS and tuberculosis clinical and translational studies, studies of HIV induced chronic inflammation and studies on HIV mucosal immunity and schistosomiasis in Tanzania. Other interests include improving informed consent and empirical studies to inform ethical guidelines for the conduct of clinical research in resource-poor countries. The training of clinician scientists in the United States, Haiti, and Tanzania is an integral part of his research activity.

dwf2001@med.cornell.edu

James Gallagher, MD, is an Associate Professor of Clinical Surgery and Director of the William Randolph Hearst Burn Center at New York-Presbyterian Weill Cornell Medical Center. He is known for his international experience in burn care. He is committed to teaching and sharing his expertise in this field with the ultimate goal of improving burn care, preventing burn injuries, and burn first aid. It is with this passion and dedication to burn care that led Dr. Gallagher to Tanzania where he has helped develop a comprehensive pediatric burn center. In 2008, Dr. Gallagher and his family relocated to New York City and Dr. Gallagher rejoined the team at the William Randolph Hearst Burn Center at New York-Presbyterian Weill Cornell for children and adults, and is the only burn center in the City of New York verified by the American Burn Association.

jag9027@med.cornell.edu

Alfred C. Gellhorn, MD, is an Associate Professor in the Department of Rehabilitation Medicine at Weill Cornell Medicine. He was a volunteer in the US Peace Corps serving in Lesotho, Southern Africa, from 1997-1998. Following this, he completed medical school at the University of Pennsylvania and residency training at the University of Washington in Seattle. He completed a sports medicine fellowship and his current clinical and research interests involve the use of regenerative therapies to treat joint and tendon injuries. Since 2014 he has partnered with Weill Bugando Medical Center in Mwanza Tanzania to study the use of platelet rich plasma as a treatment for osteoarthritis in a low resource setting.

alg9109@med.cornell.edu

Marc Goldstein, MD, DSc (hon), FACS, a summa cum laude graduate of the College of Medicine, State University of New York – Downstate Medical Center in Brooklyn, worked as a resident in general surgery at Columbia Presbyterian Hospital. After three years overseas in the U.S. Air Force, attaining the rank of Major and flying in F4 Phantom aircraft as a Flight Surgeon, Dr. Goldstein was trained in urology at Downstate Medical Center. He is the Matthew P. Hardy Distinguished Professor of Reproductive Medicine and Urology; Surgeon-in-Chief, Male Reproductive Medicine and Surgery; and Director of the Center for Male Reproductive Medicine and Microsurgery at the New York Presbyterian Hospital Weill Cornell Medical Center. Dr. Goldstein is internationally renowned for his pioneering work in vasectomy reversals and microsurgical repair of varicoceles and blockages. He was the first American surgeon to be trained in, and perform, the Chinese method of No-Scalpel Vasectomy. He has introduced the microsurgically assisted inguinal hernia repair which significantly reduces complications and failures. He is currently active in global health, helping to spearhead HIV risk reduction efforts in both China and Africa. He is an active participant in translational research and is currently involved in a HIV risk reduction study using a novel male circumcision device, named the ShangRing.

mgoldst@med.cornell.edu

Linnie M. Golightly, MD, is an Associate Professor of Clinical Medicine and Microbiology. Dr. Golightly trained in internal medicine at Harlem Hospital and in infectious diseases and molecular parasitology at Harvard University. Dr. Golightly's current research interests include: (1) Pathogenesis of cerebral malaria as mediated by microvascular damage/repair. These studies are in collaboration with Dr. Ben Gyan at the NMIMR in Ghana. (2) Development of a cell phone-imaging probe for diagnosing cerebral malaria. The project is in collaboration with Dr. Alberto Bilenca of the Ben-Gurion University in Israel. (3) Studies of Plasmodium falciparum parasite resistance and population structure in collaboration with investigators in GHESKIO in Port-au-Prince Haiti. Dr. Golightly has recently been appointed Associate Dean of Diversity and Inclusion.

lgolight@med.cornell.edu

David P. Hajjar, PhD, received his PhD in Biochemistry in 1978 from the University of New Hampshire, after which he became a post-doctoral fellow at both Cornell University Medical College and The Rockefeller University. Dr. Hajjar has made significant contributions to cardiovascular research. As a Fulbrighter, Dr. Hajjar worked in Qatar in concert with Weill Cornell Medical College–Qatar, and the College of Arts and Sciences of Qatar University, to strengthen the biomedical research and educational enterprise of Qatar and to develop science policies and opportunities for collaborations between Cornell and Qatar University. In 2014, the National Academies selected him to be a Jefferson Science Fellow in the U.S. State Department to work in the Bureau of Global Health to continue his work on science diplomacy and policy issues as they relate to human health and disease in the Near East; and, in 2016, he became a senior fellow at the Brookings Institute focusing on educational science policy issues as they relate to human health and disease.

dphajjar@med.cornell.edu

Roger Härtl, MD, is a Professor of Neurological Surgery and Director of Spinal Surgery and Neurotrauma at the Weill Cornell Brain and Spine Center in New York, and the Director of the Weill Cornell Medicine Center for Comprehensive Spine Care. Dr. Härtl's clinical interest focuses on simple and complex spine surgery for degenerative conditions, tumors and trauma as well as biological approaches for disc repair and regeneration. He is a world-renowned pioneer and leader in minimally invasive spinal surgery and computer-assisted spinal navigation surgery. He is actively involved in improving neurosurgical care in developing countries as the leader of Weill Cornell's Global Health Neurosurgery Initiative in Tanzania.

roh9005@med.cornell.edu

Duncan Hau, MD, is an Assistant Professor of Pediatrics at Weill Cornell Medicine. He received his B.S. from Cornell University and his M.D. from Tufts University School for Medicine. He completed his pediatric residency at NewYork-Presbyterian Hospital/Weill Cornell Medical Center. After residency, he spent two years in Mwanza, Tanzania with the Baylor International Pediatric AIDS Initiative to scale-up pediatric care and pediatric HIV services at Bugando Medical Center. This included establishing the Baylor-Tanzania Center of Excellence Clinic to provide comprehensive care and treatment for HIV infected children, training health care providers, and improving health care delivery systems in the Mwanza region. Now back living in NYC and working for Weill Cornell Medicine, Dr. Hau is involved with the medical education for pediatric residents going on their global health elective to Bugando Medical Center, and is involved with research focusing on reducing child mortality in low-income countries

dkh2001@med.cornell.edu

Caitlin Hoffman, MD, graduated Summa Cum Laude from Columbia University before receiving her M.D. from Weill Cornell Medical College. She completed a neurosurgical residency and chief residency at New York-Presbyterian Hospital/Weill Cornell Medical Center and Memorial Sloan Kettering Cancer Center, then went on to complete advanced fellowship training in pediatric neurosurgery at the Hospital for Sick Kids in Toronto. Her clinical research focuses on advancement of minimally invasive approaches toward epilepsy treatment and genomic factors associated with outcome in craniosynostosis. She has a significant interest in global neurosurgery and is the co-chair for an international summit on the state and future of global neurosurgery initiatives and is involved in the department's Tanzania mission to provide training and surgical presence.

ceh2003@med.cornell.edu

Kevin Holcomb, MD, FACOG, a graduate of Cornell University, he received his M.D. at New York Medical College, Valhalla, NY. His post-doctoral training has included an internship and residency in Obstetrics and Gynecology at New York Hospital – Cornell Medical Center. Dr. Holcomb is currently an Associate Professor of Clinical Obstetrics and Gynecology. In addition to helping diagnose and treat gynecologic cancers, Dr. Holcomb continues to develop more effective techniques in chemical, radiological and surgical treatments for these pernicious conditions. He is also very interested and active in the development of robotic and laparoscopic surgical techniques for gynecologic cancers. His research activities include clinical trials of new chemotherapy regimens as well as research in endometrial cancers and lymph node sampling. His research interests include treatment of locally advanced cervical cancer, pre-invasive cervical lesions in HIV-positive women, and analyses of cell characteristics in human ovarian cancers. He is currently involved in international mission work on the island of Grenada.

kyr9001@med.cornell.edu

Thanakorn Jirasevijinda (TJ), MD, is an Associate Attending Pediatrician in the Division of General Academic Pediatrics at New York-Presbyterian Hospital/Weill Cornell Medical Center and Associate Professor of Pediatrics at Weill Cornell Medical College. Currently he can connect students with faculty in our overseas partners who are engaged in research projects. Please see his current active partners below:

- a. [Chulalongkorn University School of Medicine & Medical Center, Bangkok, Thailand.](#)
- b. [University of Glasgow School of Medicine & Royal Hospital for Children Glasgow, Glasgow, Scotland](#)
- c. [Shanghai Jiaotong University School of Medicine & Affiliated Hospitals, Shanghai, China](#)
- d. [Osaka City University School of Medicine & Hospital, Osaka, Japan](#)
- e. [Yodogawa Christian Hospital, Osaka, Japan. Pediatric Palliative Care/Osaka City University School of Medicine](#)

thj2002@med.cornell.edu

Warren D. Johnson, Jr., MD, is the B.H. Kean Professor of Tropical Medicine, Founding Director of the Center for Global Health. Dr. Johnson's career has been committed to research and training in infectious diseases, particularly in resource poor countries. His interests have included studies on AIDS, tuberculosis, and shistosomiasis, and leishmaniasis. His research has received uninterrupted NIH and foundation support in Brazil (1969-2017), Haiti (1979-2021), including a NIH Merit Award (1990), and in Tanzania (2006-2018). He has chaired numerous NIH Research Committees and served on the NIH and the NIAID National Advisory Councils. He also served as a Director of the ABIM, Chair of the ABIM Infectious Diseases Subspecialty Board, and as a Councilor of the IDSA. He is a member of the Brazilian National Academy of Science. Dr. Johnson was honored by having the GHESKIO medical center in Haiti named for him. In 2016, Dr. Johnson received the Columbia University College of Physicians and Surgeons Gold Medal for Excellence in Clinical Medicine.

wjohnso@med.cornell.edu

Christine Joyce, MD, received her medical degree from Stony Brook University. She is an Assistant Professor of Pediatrics in the Division of Pediatric Critical Care Medicine. Her interest in global health started during her pediatrics residency, where she completed a rotation at Weill Bugando Medical Center (BMC) in Mwanza, Tanzania. During fellowship she had the opportunity to work under the Head of Pediatrics, completing a project evaluating the epidemiology of bacteremia in pediatric patients and clinical predictors of resistant disease. Now as junior faculty, her current quality and research interests are being performed as a collaboration between BMC, Weill Cornell, the American Heart Association, and the Kenya Medical Research Institute. Active projects include "The Implementation of a Clinical Information Network in Mwanza, Tanzania," and "Evaluation of a Simulation Program to Teach First Line Providers how to recognize and Manage Severe Illness in Pediatric Patients." Her overall work focuses on early recognition of critical illness and implementation of stabilizing measures prior to disease progression. The implementation of a clinical information network aims to bring a pre-established network from Kenya to Tanzania, to improve the quality of medical records, allow for an audit and feedback system, and to more accurately understand disease metrics that will allow for improvements in quality of care.

clj9014@med.cornell.edu

Björn F. C. Kafsack, PhD, MHS, is an Assistant Professor in Microbiology & Immunology. Dr. Kafsack earned a PhD and Masters in Bioinformatics from Johns Hopkins University investigating how *Toxoplasma gondii* parasites invade their host cells and exit from them. His subsequent postdoctoral work at Princeton University focused on defining mechanisms of gene regulation in malaria parasites and led to the identification of the transcriptional master regulator of malaria transmission. Since joining WCM in 2015, his research has expanded to define the regulatory network and mechanisms controlling this critical step in the parasite lifecycle through molecular and chemical genetic approaches.

bjk2007@med.cornell.edu

Gunisha Kaur, MD, MA, earned her B.S. from Cornell University in 2006, graduated from Weill Cornell Medical College in 2010, and completed her Anesthesiology Residency training at Weill Cornell Medical College/New York Presbyterian Hospital in 2014. Dr. Kaur holds a Master's in Medical Anthropology from Harvard University. In 2008, she published the book, *Lost in History: 1984 Reconstructed*, which documents human rights violations in South Asia. She is an anesthesiologist specializing in international health and is leading the Department of Anesthesiology's Global Health Initiative. She also serves as the Program Director for the Anesthesia Global Health Fellowship. Her work is centered around bringing both clinical as well as global health education to faculty, residents, and medical students at Weill Cornell Medical College. The programs that she has designed are focused on providing education on the biosocial factors that impact health, such as human rights abuses, gender violence, and conflict over natural resources. Dr. Kaur's current research projects include the evaluation of chronic pain in survivors of torture and detailing the biosocial factors that impact health in the developing world.

gus2004@med.cornell.edu

Justin Kingery, MD, PhD, is an Instructor in Medicine at Weill Cornell Medical College/New York Presbyterian Hospital and the Weill Bugando College of Health Sciences, Tanzania. He completed his Internal Medicine residency training at the University of Louisville Hospital after obtaining a combined MD/PhD degree from the University of Louisville focusing on cardioimmunology. From 2015-2018, he completed the Weill Cornell Global Health Research Fellowship studying cardiovascular disease in Tanzania. Dr. Kingery's interest is in the interplay of the immune and cardiovascular systems with a current focus on the immune mechanisms of cardiovascular disease in HIV-infected populations and how this translates to the general, HIV-negative population. His secondary interest is in mental health as it relates to immunology and cardiovascular disease.

jrk9006@med.cornell.edu

Dr. Richard Lee, MD, MBA, completed his undergraduate degree at Duke University and his MD/MBA in Healthcare Management at the University Of Pennsylvania School Of Medicine and the Wharton School. He completed his surgical internship and urology residency at Weill Cornell Medical College/New York-Presbyterian Hospital. He currently holds joint appointments within the Departments of Urology as well as Healthcare Policy & Research and currently serves as Program Director for the Urology department. Dr. Lee is active in global health, helping to spearhead HIV risk reduction efforts in both China and Africa. He is an active participant in translational research and is currently involved in a HIV risk reduction study using a novel male circumcision device, named the ShangRing. He has established collaborations with several other leading institutions, including The Population Council, Rockefeller University, Cornell Tech, and the Mayo Clinic. He is board certified by the American Board of Urology and holds a subspecialty certification in Female Pelvic Medicine and Reconstruction as well.

ril9010@med.cornell.edu

Philip S. Li, MD, is a Professor of Research in Urology and Professor of Research in Reproductive Medicine; Director of the Male Infertility Microsurgical Research and Training Program at the Center for Male Reproductive Medicine and Microsurgery in the Department of Urology, and Cornell Institute for Reproductive Medicine, Weill Cornell Medical College of Cornell University. He is the Co-Director of the Center for the Chinese Andrology and Male Infertility Microsurgical Training by the Chinese Society of Andrology and the Chinese Society of Sexual Medicine. Dr. Li is an internationally recognized expert in the no-scalpel vasectomy (NSV) and a leading researcher in male infertility microsurgery. He has been one of the key figures in developing the surgical manual and protocol for the NSV technique, which has become the most popular vasectomy technique in North America. Working closely with his mentor, Dr. Marc Goldstein, Dr. Li plays a key role in leading several international RCT studies, as well as surgical training workshops for the ShangRing circumcision technique for HIV prevention in Africa and China. The ShangRing circumcision RCT in Africa was published by the WHO in its official pamphlets in 2012 and 2013.

psli@med.cornell.edu

Jyoti S. Mathad, MD, MSc, is an Assistant Professor of Medicine. Dr. Mathad received her M.D from Albany Medical College and completed her clinical training in Internal Medicine at the University of Maryland, where she served as Chief Resident. She returned to New York for training in infectious diseases at New York Presbyterian-Weill Cornell Medical College. During her fellowship, Dr. Mathad obtained a masters in Clinical Epidemiology and conducted research on the performance of latent tuberculosis screening tests in pregnant women in Pune, India. Now, her research focuses on the immune changes that occur during pregnancy and how they affect the diagnosis and treatment of infectious diseases. Dr. Mathad is also an investigator in the International Maternal, Pediatric and Adolescent AIDS Clinical Trials Group (IMPAACT) and chairs a trial on the safety, efficacy and tolerability of isoniazid/rifampentine for TB prevention in pregnant and postpartum women.

jsm9009@med.cornell.edu

Molly McNairy, MD, MSc, is a clinician-scientist trained in internal medicine. Her research focus is on improving the delivery of HIV care in resource-poor settings around the globe. Her work aims to reduce HIV-related mortality and decrease HIV transmission among vulnerable populations. During the past decade McNairy has worked in multiple countries in sub-Saharan Africa, where she has collaborated with various national governments to provide and expand HIV care and treatment to vulnerable populations. One example of McNairy's research is the [Link4Health study](#), funded by the [National Institutes of Health](#) and the [Bill & Melinda Gates Foundation](#). This study evaluated both structural and behavioral interventions to improve the linkages between HIV testing and care, as well as retention in care, among adults in Swaziland. A key focus of McNairy's work in Haiti is providing HIV testing among high-risk adolescents living in the slum communities adjacent to the [GHESKIO-Cornell clinic](#). She also works on many projects in Haiti related to cardiovascular disease.

mam9365@med.cornell.edu

Estomih Mtui, MD, received his medical degree at the University of Dar-es Salaam, Tanzania. He is a Professor of Anatomy in Radiology, and Clinical Anatomy in Neurology and Neuroscience. He is a member of the Tanzania Medical Association, Society of Neuroscientists of Africa (SONA), and the International Brain Research Organization. At Weill Cornell Medicine, he has served as a member of the International Committee for eighteen years. He has assisted students with elective project placement at the Kilimanjaro Christian Medical Center in Moshi, and Weill Bugando in Mwanza Tanzania. The scope of these projects include; cervical cancer, albinism, nutrition, ophthalmology, and HIV research.

epmtui@med.cornell.edu

Carl Nathan, MD, is the R.A. Rees Pritchett Professor and Chairman of the Department of Microbiology and Immunology at Weill Cornell Medicine. After 18 years as co-chair of the Program in Immunology and Microbial Pathogenesis at Weill Graduate School of Medical Sciences of Cornell University, he became dean of the Graduate School in September 2017. His lab is currently working to better understand the interaction between *Mycobacterium tuberculosis* and the host and to gain more control over the interaction. The lab takes a multidisciplinary approach to problems of *Mtb*'s biochemistry, antibiotic tolerance, antibiotic resistance and vulnerability to interventions, be they small chemical compounds or antibodies that target the pathogen or the host. We participate in two overlapping consortia— the Bill & Melinda Gates Foundation's TB Drug Accelerator, and the NIH-funded Tri-Institutional TB Research Unit. Both consortia include academics at other institutions and drug companies in the US and abroad.

cnathan@med.cornell.edu

Mayur Narayan, MD, MPH, MBA, MHPE, FACS, FCCM, FICS, is an Attending Surgeon at Weill Cornell Medical Center in the Division of Trauma, Burns, Critical and Acute Care Surgery. Dr. Narayan received his MD from the Eastern Virginia Medical School (EVMS). He serves as the Visiting International Faculty for Trauma at the All-India Institute of Medical Sciences, New Delhi, and the King George Medical College in Lucknow as well as the Chengdu 120 Emergency Command Center Chengdu, China. He strives to provide the most humanistic care possible to critically ill or critically injured patients and their families and to help educate the next generation of Acute Care Surgeons who specialize in trauma, emergency surgery and surgical critical care – not just in knowledge and technical expertise – but also in the healing art of medicine. He is involved with many global health projects related to trauma, emergency surgery and critical care in India which include partnership organizations such as Stop the Bleed Hemorrhage Control, Advocacy and Policy Work at SaveLife Foundation and a Mobile Hospital in Rural Puttaparthi.

man9137@med.cornell.edu

Oksana Ocheretina, PhD, is an Assistant Professor of Microbiology in Medicine. She obtained a PhD in Biochemistry from University of Osnabrueck, Germany in 1995. She works in Center for Global Health and spends most of her time in Haiti where she directs Microbiology Laboratory at the GHESKIO Centers.

oko2001@med.cornell.edu

Jean W. Pape, MD, is the Howard and Carol Holtzmann Professor of Clinical Medicine, Center for Global Health, Division of Infectious Diseases, Weill Cornell Medical College, NY USA, and Director, Les Centres GHESKIO, Port-au-Prince, Haiti. Dr Pape joined the Cornell Faculty in 1980. He developed an effective care model for infants with diarrhea in Haiti. Expansion of the model nationwide resulted in a 50% decrease in national infantile mortality. Dr Pape is credited with the recognition and 1st comprehensive description of AIDS in the developing world. In 1982, he established GHESKIO (Haitian Study Group on Kaposi Sarcoma and Opportunistic Infections) as one of the 1st AIDS centers in the world. More than three decades later, GHESKIO continues as one of the largest AIDS /TB treatment, training and research center in the Americas providing free care to >250,000 patients with HIV infection, STIs and TB, annually. He received many awards including the Légion d'Honneur (France, 2002), member of the Institute of Medicine (USA, 2003); Carlos Slim Health Research, Institut de France's Christophe Mérieux, Gates Global Health, Clinton Global Citizen, WHO Stop TB Partnership Kochon Award. In 2014, he received Haiti's highest honors, 'Honneur et Mérite, Grade Commandeur'.

jwp2001@med.cornell.edu

Robert N. Peck, MD, MS, DTM&H, is an Assistant Professor in Medicine and Pediatrics. Dr. Peck is boarded in medicine and pediatrics with additional training in epidemiology and tropical diseases. Since 2007 he has been working full-time in Mwanza, Tanzania as a faculty member of Weill Cornell and the Weill Bugando School of Medicine (WBSM). He coordinates the collaboration between WCMC and WBSM and also works at WBSM as an intensive care physician and medical educator. His research focuses on non-communicable diseases (NCDs), particularly hypertension, and the interactions between NCDs and infectious diseases such as HIV and renal disease and tuberculosis and diabetes mellitus. He also collaborates with the Tanzanian National Institute of Medical Research (NIMR) on community surveys for non-communicable diseases and is working on a cluster-randomized trial to evaluate a health systems intervention to improve health outcomes for adults living with chronic diseases. Current projects include studies of new-onset hypertension in young adults in Tanzania and the association between chronic inflammation, infections and hypertension.

rnp2002@med.cornell.edu

Vivian Pender, MD, is a Clinical Professor of Psychiatry at the Weill Cornell Medical College and a Training Psychoanalyst at Columbia University. At the United Nations she represents the International Psychoanalytical Association and the American Psychiatric Association. Until 2011, she chaired the NGO Committee on the Status of Women and now chairs the NGO Committee on Mental Health, coalitions of non-government organizations in consultative status with the UN. She is a co-investigator on a Weill Cornell Department of Internal Medicine innovative grant to study "Experiences of Sex Trafficking Victims in Healthcare Settings." She produced four documentaries of conferences at the United Nations on mental health, human rights, human trafficking and violence. She has published journal articles and book chapters on affect, pregnancy, sex trafficking, and leadership. In 2016 her edited book *The Status of Women: Violence, Identity and Activism* was published.

vp52@cumc.columbia.edu

Jeffrey Perlman, MB, ChB, is a Professor of Pediatrics at the New York-Presbyterian Phyllis and David Komansky Children's Hospital at Weill Cornell Medicine and Chief of the Division of Newborn Medicine at Weill Cornell Medicine. He also directs the Neonatal Intensive Care Unit (NICU). He received his medical degree from the University of Cape Town (1974). His research interests include understanding the mechanisms of brain injury and potential treatment strategies in the preterm and term infant including intraventricular hemorrhage and hypoxic ischemic brain injury, optimizing the management of depressed newly born infants in the delivery room and reducing neonatal mortality morbidity in the low resource setting. A world-renowned expert in neonatal medicine, Dr. Perlman is currently working to build and sustain a Neonatal Global Health Program with the goal of reducing neonatal mortality and morbidity in Tanzanian and South Africa.

jmp2007@med.cornell.edu

Paula Roy-Burman, MD, DTM&H, completed her undergraduate studies at the University of California at Berkeley and obtained her medical degree from the Keck School of Medicine at the University of Southern California with an emphasis on community health. She completed residency in Internal Medicine at Weill Cornell Medical College and a Global Health Leadership Fellowship at Massachusetts General Hospital. She has earned a Diploma of Tropical Medicine and Hygiene from the London School of Hygiene and Tropical Medicine and is certified in point-of-care ultrasound. Roy-Burman's academic interests include medical education and healthcare delivery in resource-limited environments. Most recently, her work has centered in East Africa. In western Kenya, she was integral to developing a Family Medicine Residency Program at Sagam Community Hospital. In Tanzania, her work has focused on residency education where she has developed curriculums for electrocardiograms and ultrasound and their integration into practice in low-resource settings. She is currently working on a core curriculum for point-of-care ultrasound which can be used by mid-level healthcare providers.

par2015@med.cornell.edu

Kyu Y. Rhee, MD, PhD, received his medical degree from California Irvine School of Medicine, and completed his residency and fellowship at NewYork-Presbyterian Hospital/Weill Cornell Medical Center. He is an Associate Professor of Medicine and Microbiology and Immunology. His research interest is in Tuberculosis and infectious disease. *Research laboratory description:* A defining interest of our laboratory is the identification of new antibiotic targets and mechanisms. Unlike virtually every other field of medicine, infectious diseases is the only discipline to become progressively less and less effective over time. A commonly overlooked fact is that virtually all antibiotics in clinical use were discovered serendipitously with little foresight. As a result, we lack sufficient knowledge of what defines a good drug target and how to develop new antibiotics from it. We aim to address this deficiency by applying novel mass spectrometry-based metabolomics approaches to gain insight into the underlying biology of Mycobacterium tuberculosis, (ie, what makes TB TB) and its response to perturbation through the pharmacologically and diagnostically relevant level of metabolites.

kyr9001@med.cornell.edu

Bruce R. Schackman, PhD, MBA, is the Saul P. Steinberg Distinguished Professor of Healthcare Policy & Research at Weill Cornell. He received his PhD from Harvard University. He is also the Director of CHERISH – The Center for Health Economics of Treatment Interventions for Substance Use Disorder, HCV, and HIV. His current research includes economic evaluations of HIV and hepatitis C screening and treatment in substance use treatment settings, and economic evaluations of treatments for opioid use disorder. He has been involved for over 10 years in research and training on cost and cost-effectiveness evaluation and implementation science research in Haiti in collaboration with the GHESKIO Center and Weill Cornell Global Health faculty. He is currently collaborating on a study of community cohort care for HIV-infected adolescents in Haiti.

brs2006@med.cornell.edu

Dirk Schnappinger, PhD, received his PhD in Microbiology from the University of Erlangen, Germany. His global health expertise involves anti-bacterial drug development. His research group tries to facilitate drug development (i) by identifying new targets for the development of new drugs to treat Tuberculosis, and (ii) helping to identify the mechanism of action by which small molecules (including hit compounds of whole-cell screens) inhibit the growth of Mycobacterium tuberculosis. The institutions Dr. Schnappinger has collaborated with include: GlaxoSmithKline, NIAID, Harvard University, University of Massachusetts, Texas A&M, IDRI, Broad Institute, University of Minnesota, University of Cape Town (South Africa), Institute of Pharmacology and Structural Biology (Toulouse, France).

dis2003@med.cornell.edu

Joseph Shin, MD, is a clinician-educator and advocate with expertise in health and human rights. He completed his training at NYU/Bellevue Medical Center, working closely with the Program for Survivors of Torture and Physicians for Human Rights. He currently serves as an Assistant Professor of Medicine in the Division of Hospital Medicine and the Medical Co-Director for the Weill Cornell Center for Human Rights where he conducts medical forensic evaluations for survivors of human rights abuses and torture. He also works closely with a broad coalition of medical, legal aid, social service and human rights organizations to improve the lives of populations vulnerable to human rights abuses such as refugees, asylees, survivors of torture, incarcerated populations in correctional facilities and immigration detention centers, and victims of human trafficking.

jos9223@med.cornell.edu

Matthew Simon, MD, MS, is an Assistant Professor of Medicine in the Division of Infectious Diseases and an Assistant Professor of Healthcare Policy and Research in the Division of Comparative Effectiveness and Outcomes Research. He is the Associate Hospital Epidemiologist and an Assistant Attending Physician at New York-Presbyterian Hospital/Weill Cornell Medical Center. Dr. Simon is board-certified in internal medicine and infectious diseases. His academic interests include clinical decision analysis and cost-effectiveness analysis of infectious disease problems.

mss9008@med.cornell.edu

Barry Smith, MD, PhD, received his medical degree from Weill Cornell, PhD from MIT, and is now President and CEO of The Rogosin Institute and Professor of Clinical Surgery, has had a nearly forty-year history of global health work that has included the Problem Solving for Better Health[®] (PSBH[®]) health professional and community training program. The PSBH[®] program teaches the most basic principles of the scientific method with a particular emphasis on the involvement of community residents in determining and testing solutions to practical and pressing health problems. Today, PSBH is housed within the Center for Health Action and Policy (CHAP) of The Rogosin Institute, which is headed by Dr. Smith, and is closely affiliated with Weill Cornell Medical College and the New York Presbyterian Hospital healthcare system. CHAP (under the direction of Pamela Hoyt-Hudson, B.S., R.N.) is currently especially active in basic healthcare PSBH programs in China as well as Zambia and Kenya in Africa. If you are interested in learning more about these programs, or participating in research involved in them, please contact Dr. Barry Smith at 212-746-1551 or Pamela Hoyt-Hudson at 646-317-0417.

bas2005@nyp.org

Selin Somersan-Karakaya, MD, is an Assistant Professor of Medicine. Dr. Somersan-Karakaya received her M.D. from Harvard Medical School, Harvard-MIT Health Sciences and Technology Program. She completed her clinical training in Internal Medicine followed by Infectious Diseases at Weill Cornell Medical College. Her research focuses on understanding the host pathogen interactions of *Mycobacterium tuberculosis* (Mtb); a global pathogen that is the leading cause of death due to infection worldwide. The objective of Dr. Somersan-Karakaya's research is to improve our understanding of Mtb mechanisms so antibiotic mediated killing can be synergized with host mediated control of Mtb. A goal in her laboratory is to identify pathways that will lead to killing of non-replicating Mtb. Another mechanism Mtb developed to resist host defenses is by manipulating and resisting toxicity mediated by host sphingolipids. Recent work in Dr. Somersan-Karakaya's lab focuses on characterizing how Mtb interacts with host sphingolipids, and determining targets that can thwart Mtb's resistance to this minimally explored host immune defense pathway.

ses9022@med.cornell.edu

Grace Sun, MD, is an Assistant Professor of Ophthalmology at Weill Cornell Medicine and Assistant Attending Ophthalmologist at New York-Presbyterian Hospital/Weill Cornell Medicine and is the Director of the Ophthalmology Clinical Practice at Weill Cornell Medicine - Lower Manhattan at 156 William Street. Dr. Sun has a strong interest in global health. She served as a Peace Corps volunteer in Nicaragua from 1999-2001. She is a voluntary faculty ophthalmologist with ORBIS International, a non-profit organization whose mission is to eliminate avoidable blindness in developing countries. This has led her to numerous cities in China, as well as in Peru and in Kenya to teach about eye disease and cataract surgery, where not only her ophthalmic expertise is helpful but her language skills in Mandarin Chinese and Spanish have facilitated care. Currently, Dr. Sun is involved in establishing international clinical, teaching, and research collaborations in Tanzania with Bugando Medical College and the University of Dodoma. She recently received the Women in Ophthalmology Humanitarian Award in 2017 for her humanitarian efforts globally in Tanzania and locally in New York City.

grs2003@med.cornell.edu

Radhika Sundararajan, MD, PhD, received undergraduate and graduate degrees in Anthropology from SUNY Binghamton and the University of Pennsylvania, respectively. She earned an MD from New York University School of Medicine and completed her residency training at the Harvard-Affiliated Emergency Medicine Residency Program. During residency, she served as PI on studies investigating social and structural barriers to malaria control in endemic regions (India & Uganda). She is an Assistant Professor in the Department of Emergency Medicine, in addition to her affiliation with the Center for Global Health. Her research interests include HIV, malaria, and health behavior, and she has active global health projects in Uganda and Cameroon.

Ras9199@med.cornell.edu

Art Sedrakyan, MD, PhD, is a Professor at Weill Cornell Medical College and is also leading US Food and Drug Administration's (FDA) Medical Device Epidemiology (MDEpiNet) Coordinating, Science and Infrastructure Center. At Cornell he also directs patient centered comparative outcomes research center projects. He is a trained CT surgeon and a graduate of Johns Hopkins University with PhD in Health Policy and Management. He was a lead adviser on interventions (including surgery), implantable devices and cardiovascular and orthopedic content areas. He is currently serving as a ranking member and was previously the Vice-Chair of Medicare Evidence Development & Coverage Advisory Committee. Dr. Sedrakyan is the Vice-Chair of the IDEAL initiative with special interest/leadership area in devices. Dr. Sedrakyan is the initiator (with FDA) and principal investigator of the FDA's International Consortium of Orthopedic Registries (ICOR), International Consortium of Cardiac Registries (ICCR) and International Consortium of Vascular Registries (ICVR) and national coordinated registry network (CRN) community of practice. These national and international initiatives aim to advance the infrastructure for regulatory science, surveillance and comparative effectiveness for medical devices and interventions via learning healthcare system. The registry and other big data such as claims have a potential to revolutionize the health services research and approach to quality and efficiency improvement in care.

ars2013@med.cornell.edu

Sheida Tabaie, MD, is a board-certified anesthesiologist with sub-specialty board certification in critical care medicine. Dr. Tabaie earned her M.D. at the University Of Pennsylvania School Of Medicine, and did her residency training and critical care fellowship at NewYork-Presbyterian/Weill Cornell Medical Center. Following her fellowship, Dr. Tabaie pursued further training in global health through the Department of Anesthesiology Global Health Fellowship at Weill Cornell. Currently, Dr. Tabaie works as both an anesthesiologist and an intensivist in the Cardiothoracic ICU at Weill Cornell. Dr. Tabaie is an active medical researcher and global health advocate who is committed to bringing insights of both research and modern clinical techniques to the developing world. She has participated in numerous research and educational trips in Botswana, Uganda, Tanzania and India.

stb9054@med.cornell.edu

Mary A. Vogler, MD, is an Associate Professor of Clinical Medicine. Dr. Vogler trained in internal medicine at the University Of Connecticut School Of Medicine and in infectious diseases at New York University School of Medicine where she served on the faculty prior to coming to Weill Cornell in 2004. Dr. Vogler serves as an HIV/AIDS primary care provider in the Center for Special Studies both for HIV-infected adults and adolescents. She also participates actively as an investigator in the NIH-funded Cornell HIV/AIDS Clinical Trials Unit (CCTU). Her area of expertise is in the care of HIV-infected women, including pregnancy and prevention of mother-to-child transmission. She received the AIDS Clinical Trials Group (ACTG) Women’s Health Investigator award in 2007. She has recently joined the NYP Antimicrobial Stewardship Program as a clinical representative

mav9046@med.cornell.edu

Kathleen Walsh, MD, is a hospitalist certified in internal medicine. She is a General Medicine/Global Health Research Fellow at Weill Cornell. Her academic interests include research of the diagnosis and treatment of tuberculosis in resource-limited settings such as Haiti. She is also interested in medical resident education.

kfw2001@med.cornell.edu

Laura Greisman, MD, is a hospitalist certified in internal medicine. She is an assisting attending physician at New York-Presbyterian Hospital, and an assistant Professor of Clinical Medicine at Weill Cornell Medical College, Cornell University. Dr. Greisman received her undergraduate degree at Cornell University, and proceeded to Albert Einstein College of Medicine of Yeshiva University to earn her MD. She has academic interests in medical education, particularly clinical reasoning and physical diagnosis skills. She also has a strong interest in global health and the delivery of care in low resource settings, specifically on the use of community health workers, mobile health, and refugee and immigrant healthcare. Dr. Greisman has also worked in Guatemala doing research on the epidemiology of GI pathogens and coordinating mobile outreach clinics. She is also working with a team in Ethiopia to develop an audiology screening program for MDR-TB patients.

lag9100@med.cornell.edu

Ramin Asgary, MD, MPH, is certified in internal medicine, preventative medicine, and tropical medicine/travel health. Dr. Asgary earned his M.D. at Tehran University in Iran, and then proceeded to earn his MPH at, both, Columbia University School of Public Health, and New York University. He has been researching the healthcare of refugees/immigrants and the homeless since 2000, and has developed related training curricula for students and residents. He has also worked and served with Doctors Without Borders-USA. Dr. Asgary is a Governing Councilor for the American Public Health Association and the President-elect for the Global Health, the American Society of Tropical Medicine and Travel Health. His interests include health disparities solutions for the homeless/immigrants/refugees, humanitarian assistance, women's health, cancer, HIV/AIDS/STDs, malaria, and ethical challenges in global health. Some of his current research includes cancer screening and chronic disease management in the homeless; medical education research related to disparities and global health curriculum development; and research related to healthcare of refugees and health and human rights.

raa9102@med.cornell.edu

Douglas Nixon, MD, PhD, was born in Cambridge, U.K., and received his undergraduate degree in immunology from University College London. He then proceeded to University of Oxford to train as a pathologist when the HIV/AIDS epidemic began to spread, and earned a Master's degree and Doctorate in Immunology. He has been a Professor and Associate Chief of the Division of Experimental Medicine at the University of California. He has also served as an Associate Investigator at the Gladstone Institute of Virology and Immunology. His research spans from clinical research and human immunology to basic virology and molecular biology. After leaving Oxford, Dr. Nixon continued to focus on creating an HIV vaccine. He has made many contributions towards this research, and was awarded the Elizabeth Glaser Scientist Award. One of his many accomplishments is publishing the first identification of an HIV specific cytotoxic T cell, and he has continued to publish many more articles.

dnixon@med.cornell.edu

Henry Wilke Murray, MD, is a professor of medicine at Weill Cornell Medical College, as well as an attending physician at New York-Presbyterian Hospital. Dr. Murray received his M.D. at Cornell University Medical College, and trained in Internal Medicine at New Hospital and Johns Hopkins Hospital and in Infectious diseases at George Washington University School of Medicine and the Rockefeller University. Some of his interests include travel medicine and parasitic infections. His past research includes experimental leishmaniosis and host defense, which has been supported by NIH for 30 years. He also established Cornell's NIH AIDS Clinical Trials Group and the Cornell Trials Unit. He also attends on the Infectious diseases clinical service and at Cornell's Travel Medicine Clinic.

hwmurray@med.cornell.edu

David Scales, MD, is an Assistant Professor of Medicine at Weill Cornell Medical College and a Hospitalist Clinical Scholar at New York-Presbyterian Hospital. Dr. Scales is trained in sociology and internal medicine. With interest in infectious diseases, he has worked with refugees in Lebanon, Jordan, and the West Bank. He is also a co-founder of Health4Palestine, a community health worker program focused on trauma and non-communicable diseases among refugees. He has also been a medical sociologist and research fellow with HealthMap.org, which is real-time epidemic surveillance based at the Children's Hospital Informatics Program at Harvard Medical School, developing a mobile application that enables the US Centers for Disease Control to do geographically-based risk analysis incorporating information on social determinants of health, migration, and infectious diseases.

das9289@med.cornell.edu

Jeffrey F. McMahon, MD, specializes in Ophthalmology and is an Assistant Professor of Ophthalmology at Weill Cornell Medical College. His practice interests include cataracts and advanced cataract surgery, laser vision correction, diabetic eye exams, and comprehensive ophthalmology. Dr. McMahon received his undergraduate degree in Molecular and Microbiology from the University of Central Florida, and he received his M.D. from Jefferson Medical College. He proceeded to complete his residency training in ophthalmology at Wills Eye Hospital in Philadelphia. His research is focused on complex cataract and refractive surgery, vitreoretinal, and ocular oncology. He specializes in cataract surgery, laser vision correction (LASIK and PRK), and general eye disease. Dr. McMahon has a strong interest in global health and academic global ophthalmology. During college, he helped establish a medical volunteering interest group, organizing and directing trips to Haiti and Peru. He has also worked abroad in Bomet, Kenya, assisting with skill-transfer by teaching local residents and students, and performing small incision cataract surgery (SICS).

jem9317@med.cornell.edu

GLOBAL HEALTH OPPORTUNITIES

First-Year Students (summer between MS1 & MS2)

Summer Experience Abroad Application Process

1. Review the Office of Global Health Education Website to learn about opportunities abroad and to explore the global health projects previously undertaken by students. Projects are sorted by topic and geographic area.
2. During **the Fall term**, students should begin to think about summer electives. It never is too early to begin to think about summer!
3. By **January**, students should have a good idea if they want to take an international summer elective. All interested students should plan to speak with one of the Global Health faculty or directly with Dr. Madelon Finkel (maf2011@med.cornell.edu), Director of the Office of Global Health Education, to arrange a meeting to discuss elective opportunities. Students should have an idea of the region of the world where they would like to spend the summer and maybe even what they would like to focus on. Summer electives can focus on population/community-based projects or existing clinical projects. No hands-on clinical projects are feasible in for 1st year students. Students are free to design their own 8-week elective, which must be discussed with your Global Health advisor and/or Dr. Madelon Finkel, Director of the Office of Global Health Education, prior to submission of the international electives application. **First year summer electives should be between 6-8 weeks in duration, preferably 8 weeks in duration.**
4. In **early February**, students should have identified where they want to take an elective, what they plan to focus on, and selected a Weill Cornell mentor for this elective. Then they should complete the [International Fellowship Application](#).
5. By the **end of February**, students should have already met with a Global Health faculty member, and completed the application, including your proposal and CV. This application should be emailed to Maritza Montalvo at mmontalv@med.cornell.edu.
6. Please sign up for Work-Study funding at the Office of Financial Aid. You will be paid by Financial Aid. (See below) Typically this application is due mid-April.
7. After your application has been approved (you will be notified via email), please complete the International Elective Application Form (the “pink” form) which you can get from the Registrar’s office or download it here: [International Elective Form \(for Registrar\)](#) and circulate it for signatures—both your advisor and Dr. Finkel will sign this form, which will then be submitted to the Registrar’s office.
8. Please sign all required forms that will be sent to you upon approval. These must be sent to Maritza Montalvo prior to departure.

Guidelines for Receiving Financial Support

1. First-year students will need to apply for work-study and should complete the related FAFSA forms before April 15, 2019. OGHE will cover the cost of round trip economy airfare to the host country if the student cannot secure work-study. Students not eligible for Work-Study should talk to Dr. Madelon Finkel for other funding options.
2. All students are required to prepare a Final Narrative (post-trip summary write-up) and submit to Maritza Montalvo upon return.

Confirmation and Cancellation Policies

Students who are notified of an approved international elective will then have 30 days from the date of approval notification to confirm or cancel the international elective. This must be done in writing to the Director of the Office of Global Health Education. If the student does not respond after 30 days he or she will be deemed to have declined the opportunity to take the elective and the elective will be made available to another student.

Once a student has confirmed his or her intent to accept the opportunity for an approved international elective, he or she is expected to keep that commitment. If a student believes that he or she needs to cancel an international elective, he or she must provide a written request with justification to the Director of the Office of Global Health Education. Compelling reasons for cancellation of a prior commitment to an international elective would include, but are not limited to, a personal illness or a major illness in a close family member (child, sibling, spouse, partner, or parent). Students who cancel the elective and are deemed to not have provided a compelling reason for their cancellation will be required to pay \$100 to cover the administrative costs incurred in preparing for that elective.

Fall Poster Presentation Event

All students who take a summer elective abroad are expected to prepare a poster for display at the Summer International Electives Poster Presentations usually held in October. This event helps the incoming first-year students to understand the types of summer electives that WCM students take.

For questions concerning the Global Health curriculum and activities, contact Katharine Grace (KG) Norris, the Global Health Teaching Associate, at globalhealthTA@med.cornell.edu or Dr. Madelon Finkel, Director Office of Global Health Education, at maf2011@med.cornell.edu.

First-Year Partner Programs

The opportunities below represent a small selection of the summer programs offered by affiliated institutions and other organizations. Students also have the opportunity to identify projects and opportunities independent from the listed affiliated institutions. Please visit the WCM International Project Database for a full list of opportunities: <https://wcmglobalhealthprojectdatabase.weebly.com/>.

1. **Guatemala:** Saving Mothers/ Salvando Madres
Independent program previous students have participated in.
<http://www.savingmothers.org/guatemala>
2. **India:** Christian Medical College
<https://www.vellorecmc.org/>
Public health/population studies elective for first-year students.
3. **Tanzania:** Kilimanjaro Christian Medical Collage (KCMC)
<http://www.kcmc.ac.tz/>
Community health studies for first-year students.
4. **Tanzania:** Weill Bugando Medical College
<https://touchfoundation.org/>
Clinical elective for fourth-year students only; community health studies for first-year students.
5. **WHO Internships**
<http://www.who.int/careers/internships/en/>
Internships in a variety of areas open to first-year students.
6. **PAHO Internships** (Pan American Health Organization)
<http://www.paho.org/hq/index.php?Itemid=4245>
Internships in a variety of areas open to first-year students.

Global Health AOC Abroad Process

Application Process

If you want to do a Global Health AOC, we encourage you to reach out to faculty listed in this booklet to find a mentor in your area of interest. Many of the faculty listed above welcome students to engage with their work abroad. For questions about the AOC process, contact the AOC Coordinator Eliis Keidong at: elk2028@med.cornell.edu Contact Dr. Madelon Finkel (maf2011@med.cornell.edu) or Dr. Dan Fitzgerald (dfitzgerald@gheskio.org) for further details about completing the Global Health AOC and for any questions about WCMC requirements.

Timeline:

MS2: In November, declare AOC and mentor for Individual Scholarly Project

MS3: In October, submit mentor approved Scholarly Project Proposal to AOC Program

MS4: Submit final Scholarly Project Written Report

Research Year (Between MS3 & MS4)

Application Process

If considering taking a year off to conduct global health research, you must plan for this placement well in advance. Programs begin accepting applications in the fall for opportunities the following year. To learn more about Global Health Fellowships and volunteer opportunities, please visit this website:

<https://international.weill.cornell.edu/weill-cornell-students/taking-year-global-health-opportunities>

Once you have an idea of the type of program and geographic area you would like to go to, Contact Dr. Madelon Finkel (maf2011@med.cornell.edu) or Dr. Dan Fitzgerald (dfitzgerald@gheskio.org) for further details about taking a year-off to engage in global health activities and for any questions about WCMC requirements. For research involving human subjects, students must complete CITI training and be added to the mentor's IRB project.

Global Health Opportunities for Fourth-Year Students Clinical Electives

Application Process

1. Review the Office of Global Health Education website to learn about opportunities abroad and to explore the global health projects previously undertaken by other students. Projects are sorted by topic and geographic area.
2. Students seeking to take an international elective in the 4th year should carve out time in their fourth year schedule. Some electives are 4-weeks in duration while most are 6-week or 8-week in duration. Please check your schedule to see how many weeks you have for this experience.
3. During the spring term of the 3rd year, students should begin to think about where they would like to go and what type of elective they are interested in. Students should meet with members of the global health faculty or individually with Dr. Madelon Finkel (maf2011@med.cornell.edu), Director of the Office of Global Health Education, to arrange a meeting to discuss options and opportunities.
4. Students may choose from established electives with our partners around the world or design their own elective. Regardless, every student must identify a WCM mentor who will be responsible for signing off on the international elective. Those who take an elective at one of the partner sites do not need to obtain an email from the host mentor. Those who create their own elective must have the host mentor send an email stating that he/she agrees to serve as mentor during your time at the host institution.
5. Some of the 4th year electives have limitations in the number of students who can take the elective. Please see the listing on our website, which delineates the number of students who will be permitted to take the specific elective.
6. Applications will be accepted beginning in April of the 3rd year. Please discuss your options with Dr. Finkel prior to submitting an application. The partnership electives are based on a first-come, first-serve basis so it is helpful if students have a Plan B. We try very hard to make sure that every student

gets to take an elective in a country of his/her choosing. Very rarely is a student not able to get his or her first or second choice of elective.

7. Once the WCM global health mentor agrees to sign off on the elective, students should access the [International Fellowship Application](#)
 - a. Complete the application and attached proposal, including a write up of why you want to take this elective, what you hope to gain by the experience, what clinical department(s) you would like to be placed in. Further, include your Curriculum Vitae and letter of support from your WCM mentor. For those taking an independent elective, please include an email from the host mentor in which the individual states that he/she agrees to serve as your mentor during your time at the institution.
8. Email your completed application to Maritza Montalvo (mmontalv@med.cornell.edu). If need be, feel free to contact her directly with questions concerning the application process.
9. After your application has been approved (you will be notified via email), please complete the International Elective Application Form (the “pink” form) which you can get from the Registrar’s office or download it here: [International Elective Form \(for Registrar\)](#) and circulate it for signatures—both your advisor and Dr. Finkel will sign this form, and then submit it to the Registrar’s office.
10. Please sign all required forms that will be sent to you upon approval. These must be sent to Maritza Montalvo prior to departure.

Financial Reimbursement

Global Health donors have generously provided Fellowships to help defray the costs of taking an international elective. Students will receive \$2,500 to be used to cover travel costs (e.g., costs of travel, accommodations and other travel-related expenses). Upon return, in order to receive travel reimbursement, please provide Maritza Montalvo (mmontalv@med.cornell.edu) with your travel receipts (proof of purchase of airline tickets), travel itinerary, and a signed Payment Request Form. Students are required to prepare a short reflection piece prior to receiving travel reimbursement. This write-up is to be submitted to Maritza Montalvo upon return to WCM.

Confirmation and Cancellation Policies

Students who are notified of an approved international elective will then have 30 days from the date of approval notification to confirm or cancel the international elective. This must be done in writing to the Director of the Office of Global Health Education. If the student does not respond after 30 days he or she will be deemed to have declined the opportunity to take the elective and the elective will be made available to another student.

Once a student has confirmed his or her intent to accept the opportunity for an approved international elective, he or she is expected to keep that commitment. If a student believes that he or she needs to cancel an international elective, he or she must provide a written request with justification to the Director of the Office of Global Health Education. Compelling reasons for cancellation of a prior commitment to an international elective would include, but are not limited to, a personal illness or a major illness in a close family member (child, sibling, spouse, partner, or parent). Students who cancel the elective and are deemed to not have

provided a compelling reason for their cancellation will be required to pay \$100 to cover the administrative costs incurred in preparing for that elective.

Spring International Poster Event

All students who take a 4th year elective abroad are expected to prepare a Poster for display at an International Event held in May. This event is designed to thank our generous donors as well as to honor the students who took an international elective.

For questions concerning the Global Health curriculum and activities, contact Priyanka Patel, the Global Health Teaching Associate, at globalhealthTA@med.cornell.edu or Dr. Madelon Finkel, Director Office of Global Health Education at maf2011@med.cornell.edu.

FOURTH-YEAR CLINICAL & RESEARCH ELECTIVE PARTNERS

AFRICA

Tanzania:

Kilimanjaro Christian Medical College (KCMC)

This is a six-week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Mtui arranges the elective with physicians at KCMC directly for the student. No host mentor letter required because Dr. Mtui handles the scheduling of the elective with KCMC physicians directly. Dr. Mtui is the WCM mentor. (up to 3 students per year)

Contact: Dr. Mtui epmtui@med.cornell.edu

Weill Bugando Medical College

This is a six-week clinical elective. Students must first meet with Dr. Fitzgerald to discuss reasons why they want this elective and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Fitzgerald coordinates the elective with physicians at Weill Bugando or asks Dr. Robert Peck who is based in Mwanza to assume this task. No host mentor letter required because of the arrangement we have with Weill Bugando. Dr. Fitzgerald is the WCM mentor. (up to 3 students per year)

Contact: Dr. Fitzgerald dwf2001@med.cornell.edu

Ghana:

Noguchi Memorial Institute for Medical Research

This six-week elective provides students the opportunity to conduct research in Infectious Diseases at one of Africa's leading research institutions. The major areas include malaria, schistosomiasis, lymphatic filariasis, HIV/AIDS, Rotavirus, Influenzas, Mycobacterial infections (tuberculosis and Buruli ulcer), and development of natural products (Ghanaian plant medicines) as treatments agents for malaria, HIV AIDS and trypanosomiasis. (1-2 students per year)

Contact: Dr. Golightly lgolight@med.cornell.edu

Accra Medical Center

This six-week elective provides the opportunity for students to experience clinical care at a leading medical center in Ghana. This elective also provides an opportunity for students to get involved in ongoing breast cancer research. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Elliot Brea with Kilimanjaro Christian Medical College mentors, Tanzania

Richmond Woodward, Weill-Bugando, Tanzania

ASIA

Bhutan-Thailand:

Khesar Gyalpo University of Medical and Chulalongkorn University

This is a four week clinical elective in Thimphu, Bhutan and a two week continuation at the Chulalongkorn University Medical College in Bangkok, Thailand. The students must first meet with Dr. Finkel to discuss reasons why they want this elective, and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Finkel coordinates the elective in collaboration with the Bhutan Foundation, in collaboration with Khesar Gyalpo University, to arrange the elective placement in Thimphu. Dr. Finkel serves as the liaison with the Bhutanese. Dr. TJ serves as the WCM faculty mentor for the Thailand part of this elective. No host mentor letter is required. (1-2 students per year)

Contacts:

Dr. Finkel maf2011@med.cornell.edu

Dr. TJ thj2002@med.cornell.edu

Simone Elder,
Chulalongkorn University
Bangkok, Thailand

China:

Central South University Xiangya School of Medicine

This is a six-week clinical elective. Students must first meet with Dr. Zhu to discuss reasons why they want this elective and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Zhu coordinates the elective with physicians at Xiangya School of Medicine. No host mentor letter required because of the arrangement we have with Xiangya School of Medicine. Dr. Zhu is the WCM mentor. No language requirement, although Mandarin is a plus. (1-2 students per year)
Contact: Dr. Yuan Shan Zhu at yuz2002@med.cornell.edu

India:

Christian Medical College Vellore

This is a four-week or six-week elective at CMC Vellore. Students must first meet with Dr. Finkel to discuss reasons why they want this elective and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Finkel coordinates the elective with physicians at CMC Vellore. No host mentor letter required because of the arrangement we have with CMC Vellore. Dr. Finkel is the WCM mentor. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Eric Kutscher, Christian
Medical College, India

Singapore:

National University of Singapore Yong Loo Lin School of Medicine

This is a six week clinical elective. Students must first meet with Dr. Esquivel to discuss reasons why they want this elective and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Finkel coordinates the elective with physicians at NUSYLLSM. No host mentor letter required because of the arrangement we have with NUSYLLSM. Dr. Esquivel is the WCM mentor (1-2 students per year)

Contacts:

Dr. Finkel maf2011@med.cornell.edu

Dr. Esquivel ere9022@med.cornell.edu

South Korea:

Yonsei University College of Medicine

This is a six week clinical elective. Students must first meet with Dr. Finkel to discuss reasons why they want this elective and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Finkel coordinates the elective with physicians at Yonsei. No host mentor letter required because of the arrangement we have with Yonsei. Dr. Finkel is the WCM mentor. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Taiwan:

National Taiwan University College of Medicine

This is a six week clinical elective. Students must first meet with Dr. Finkel to discuss reasons why they want this elective and what they hope to gain by the experience. Students then complete the OGHE application for approval. Once approved, Dr. Finkel coordinates the elective with physicians at NTMUMS. No host mentor letter required because of the arrangement we have with NTMUMS. Dr. Finkel is the WCM mentor. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Thailand:

Chulalongkorn University Faculty of Medicine

This is a six week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. TJ introduces the student(s) to the International Coordinator at Chulalongkorn who then schedules the elective for the student. The student and the International Coordinator work together to schedule placement at one of the Chulalongkorn's teaching hospitals in Bangkok. No host mentor letter is required because the International Office at Chulalongkorn handles the scheduling of the elective with Chulalongkorn physicians directly. Dr. TJ is the WCM mentor. (up to 5 students per year)

Contact: Dr. TJ thj2002@med.cornell.edu

Samrawit Abraha, Christian Medical College, India

Jacqueline Parker, University of Sydney Medical School, Australia

AUSTRALIA

Australia:

University of Sydney Medical School

This is an eight week clinical elective, two weeks of which will be in the Outback. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain from the experience. Once approved, Dr. Finkel (maf2011@med.cornell.edu) will introduce the student to the electives coordinator at the University of Sydney to set up the elective. The student will be placed at one of the University of Sydney Medical School's teaching hospitals in Sydney and will spend one week at the hospital in Broken Hill. No host mentor letter is required because the International Office at the University of Sydney sets up the elective in collaboration with the student. Dr. Finkel is the WCM mentor and coordinates with the U Sydney international office staff. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Solomon Husain, University of Sydney Medical School, Australia

EUROPE

Austria:

American Austrian Max Kade Foundation

This is a four week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. After the international committee provides approval, the second step is to apply to the Max Kade program directly. The American Austrian Foundation and the Max Kade Clinical Elective program provide a travel stipend and pocket money, as well as accommodations during a one-month rotation in Austria. A working knowledge of German is helpful but not a requirement. No host mentor letter is required because the Max Kade Foundation sets up the elective in collaboration with the student. Dr. Finkel is the WCM faculty mentor and coordinates with the Max Kade staff. (up to 15 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

France:

American Hospital in Paris

This is a four week clinical elective, as well as study of the French health care system. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to the electives coordinator at the American Hospital of Paris Foundation to set up the elective. No host letter of support necessary. (1-3 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

David C., American Hospital in Paris, France

Rene Descartes Ecole de Medicine

This is a four week clinical elective, as well as study of the French health care system. Students must first speak with Dr. Selesnick to discuss this elective. Students then should complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Selesnick will introduce the student to the electives coordinator at Rene Descartes to set up the elective. No host letter of support necessary. Proficiency in French is a plus. (1-3 students per year)

Contact: Dr. Selesnick shselesn@med.cornell.edu

Hungary:

The Medical University of Pécs

This is a six week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to the electives coordinator at the Pecs medical school to set up the elective. No host letter of support necessary. (1-3 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Bem Atim, USEU Germany

Israel:

The Ruth and Bruce Rappaport Faculty of Medicine at Technion-Israel Institute of Technology

This is a six week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to the electives coordinator at Technion medical school to set up the elective. No host letter of support necessary. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Turkey:

Hecettepe University Faculty of Medicine

This is a six week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to the electives coordinator at Hecettepe medical school to set up the elective. No host letter of support necessary. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Ali Berman, Glasgow Royal Hospital for Children

Spain:

University of Zaragoza School of Medicine

This is a four week clinical elective focusing on medical ethics. Students should meet with Dr. Fins to discuss this elective. Then the student should complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Fins will introduce the student to the electives coordinator at Zaragoza medical school to set up the elective. No host letter of support necessary. (1-2 students per year)

Contact: Dr. Fins jjfins@med.cornell.edu

United States-European Union Medical Exchange Program (US-EU):

The US-EU program is a four-week clinical placement that focuses on a study of the host country's health care system. Students should meet with Dr. Finkel to discuss this elective and placement. Then the student should complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to the electives coordinator at the host medical school to set up the elective. For the Glasgow placement, students should contact Dr. TJ in order to set up a placement. This is a Pediatric placement only.

Kings College (London, England) (1 student per year)

Ludwig Maximilians University (Munich, Germany) (1 student per year)

University of Edinburgh (Edinburgh, Scotland) (1-2 students per year)

Universidad Francisco de Vitoria (Madrid, Spain) (1-2 students per year)

University of Cologne Faculty of Medicine (Cologne, Germany)

Karolinska Institute (Stockholm, Sweden) (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Royal Hospital for Sick Children (Glasgow, Scotland) (1-2 students per year)

Contact: Dr. TJ thj2002@med.cornell.edu

CENTRAL & SOUTH AMERICA

Brazil:

UNESP School of Medicine Botucatu

This is a six week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to the electives coordinator at Botucatu medical school to set up the elective. No host letter of support necessary. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Community Center, Costa Rica

Sasha Hernandez, Guatemala

Costa Rica:

Universidad Ciencias Meddicas de Costa Rica

Six-week clinical elective in rural Costa Rica. Medical students taking this elective will participate in health care delivery with a focus on primary care. Students will learn the intricacies of coordinating health care within a system that covers a diverse population of Costa Rican and Panamanian agricultural workers as well as indigenous tribal people. Students stay at the home of Dr. Pablo Ortiz, the host mentor. Students must first speak with Dr Finkel and then complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel will introduce the student to Dr. Ortiz to set up the elective. Proficiency in Spanish required. No host letter of support necessary. (1-2 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

Amelia Kell, Lima, Peru

Peru:

San Marcos University School of Medicine

This is a six week clinical elective. Students must first complete the OGHE application stating reasons why they want this elective and what they hope to gain by the experience. Once approved, Dr. Finkel (maf2011@med.cornell.edu) will introduce the student to the electives coordinator at San Marcos medical school to set up the elective. Spanish proficiency required. No host letter of support necessary. (1-3 students per year)

Contact: Dr. Finkel maf2011@med.cornell.edu

ADDITIONAL PROGRAMS

Saving Mothers/ Salvando Madres, WHO Internships, PAHO Internships, Earth Watch Institute, Face Aid's Global Health Corps, Global Health Council, International Federation of Medical Students Association, Oxfam, Unite for Sight's Global Impact Corps

GLOBAL HEALTH CURRICULUM COMPONENTS

Course Work

Global Health Preceptorship (Fall/Spring)

Through the Essential Principles / Health Illness and Disease course, each student is required to work with a clinician preceptor– first in the Fall and again in the late Spring – to learn patient interviewing skills. Students who choose to be placed with a Global Health Preceptor will be paired, at least once, with clinicians working with underserved and/or diverse populations (e.g., The Center for Special Studies [CSS], which treats HIV patients; clinics/offices in the South Bronx [Lincoln Hospital], Queens, Long Island City, Brooklyn and Chinatown; etc.). Global Health Preceptors are aware of the challenges inherent in global health and are open to sharing their expertise with students. An informational email will be sent out in September for interested students to sign-up.

Intro to Global Health (Spring)

Introduction to Global health is a 10-week student/ faculty-designed elective that introduces students to key topics in global health through weekly seminars. Introduction to Global Course faculty are drawn from WCMC and NYC institutions, and they have extensive field and research experience in global health. Topics include: Pandemics and Epidemics, Behavior Change, Health Systems, Complex Humanitarian Emergencies, Noncommunicable Diseases, Gun Violence, Implementation Science, and Medical Anthropology. *The course is designed as an elective for first-year medical students, but is open to others.*

Foundations in Global Service (Spring)

Dr. Finkel and Dr. Golightly will address the obstacles of executing projects in resource-poor environments, provide tools for achieving project goals, and focus on travel safety tips. The sessions will also introduce you to the ethical considerations of medical service and clinical care in resource-poor settings. This program achieves its objectives through two sessions, each two hours in duration.

Seminars & Events

GH Grand Rounds

Global Health Grand Rounds is a lecture series that serves as a platform for dialogue and debate on contemporary global health challenges. Grand Rounds speakers have included Thomas F. Burke, MD, FACEP, FRSM, Chief of the Division of Global Health and Human Rights at Massachusetts General Hospital, who spoke about innovating for health transformation in resource limited settings and *New York Times* Health reporter, Donald McNeil.

GH Journal Club

The Global Health Journal Club is a student initiative designed to offer students an opportunity to discuss global health topics. Once a month, students meet to review a basic science article as well as an article detailing the clinical implementation of the research done in the laboratory. Through short student presentations, key concepts are reviewed and discussed by the group. The remainder of the time is dedicated to a conversation regarding how the research and the clinical implementation integrate global health paradigms. Some topics include: Global Mental Health, Climate Change, Gun Violence, Cancer, HIV/AIDS, Low Cost Technology Development, and Maternal and Child Health.

GH Career Seminars

Throughout the academic year, the Office of Global Health Education hosts Career Seminars. These roundtable discussions held over dinner enable interested students to meet physicians who have incorporated global health into their careers. Dustin Donley, MD, Class of 2010, led the first seminar of the 2017-2018 academic year. He discussed his time working as an instructor of surgery at Malamulo Mission Hospital in rural Malawi. His work focused on increasing the availability of safe surgery to populations without access to physician surgeon providers. Other speakers have included Dr. Adam Schwartz, a Program Manager at BRAC interested in strengthening primary care systems in developing countries, and Dr. Onyinye Balogun who focuses on improving the delivery of radiation therapy in low and middle income countries.

International Receptions

The International Receptions are a celebration of all the global health work medical students have completed abroad. The Fall reception celebrates students who spent the summer abroad, while in the Spring it is an opportunity for medical students who went abroad for 4th year clinical electives to present their work. Students will create posters detailing their experiences, and present to faculty, staff and students.

Emory GH Case Competition

The Emory Global Health Case Competition is a unique opportunity for Cornell medical students. In March, a 6-member team comprised of 2 students from WCM and 2 undergraduate & 2 graduate students from Cornell Ithaca will travel to Atlanta to compete. There are cash prizes for the top 5 teams out of about 30, and a few years ago, the Cornell team won first place! Travel expenses and all other costs are covered by WCM.

CERTIFICATE IN GLOBAL HEALTH

Certificate in Global Health

The purpose of the Certificate in Global Health is to recognize students who have dedicated significant hours to the field of global health through meaningful engagement with the global health program curriculum throughout medical school.

Requirements:

1. Select global health as your primary or secondary area of concentration*

2. Participate in Global Health On-Campus Programming:

In addition to selecting global health as their AOC, students are expected to participate in Office of Global Health Education on-campus programming. In order to qualify as certificate candidate:

a. Students must participate in at least one of the following Global Health Programs:

- i. Introduction to Global Health Course,
- ii. Global Health Collective
- iii. Global Health Case Competition
- iv. Global Health Preceptorship

3. Participate in an Experience Abroad:

- a. Year Off to Complete Global Health Research
- b. Global Health International Summer Research Experience
- c. 4th Year Clinical or Research Elective Abroad

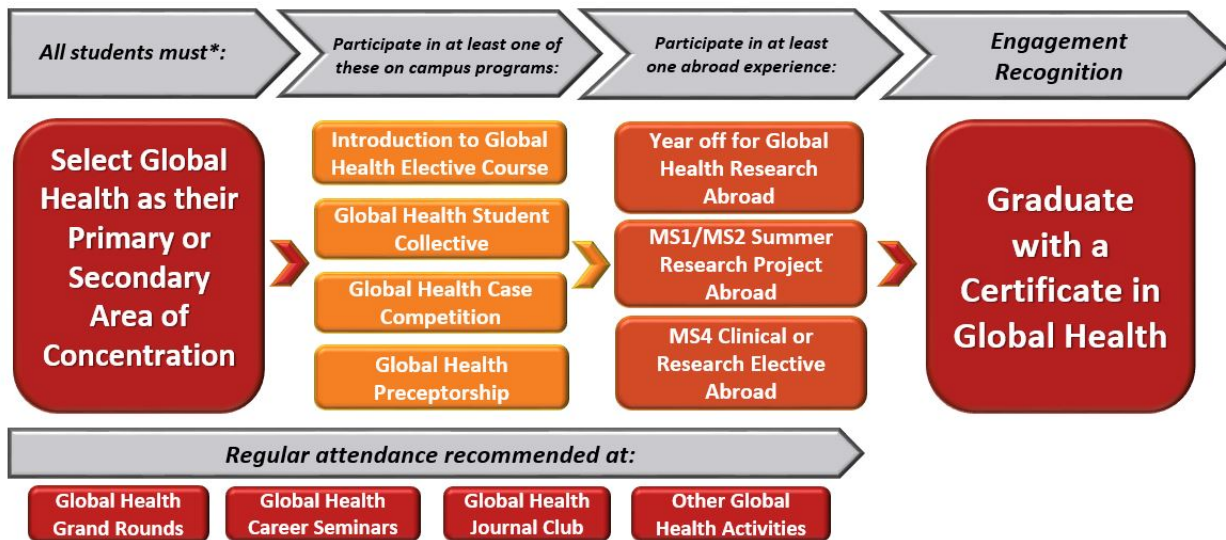

4. Students are Highly Encouraged to Attend:

- a. Global Health Career Seminars
- b. Global Health Grand Rounds
- c. Global Health Journal Clubs

* Please note: For MD/PhD students there is no AOC selection requirement. Thus in order for MD/PhD student to qualify for the certificate, they must become a member of the Global Health Collective in lieu of selecting Global Health as their primary or secondary AOC.

Please reach out to the Global Health Teaching Associate (globalhealthta@med.cornell.edu) with any further inquiries.

Criteria for a Certificate in Global Health

* For MD/PhD students there is no AOC selection requirement. Thus in order for MD/PhD student to qualify for the certificate, they must become a member of the Global Health Collective in lieu of selecting Global Health as their primary or secondary AOC.

STUDENT ORGANIZATIONS

Global Health Collective

The Global Health Collective serves two purposes with the first focus being on the support of the Global Health Curriculum. The Global Health Curriculum launched in 2009 as a student-driven combination of supplementary elective courses, fieldwork, and experiential learning. With the engagement of faculty, staff, and students, the curriculum is now an official Area of Concentration and certificate-granting program. The Global Health Curriculum provides opportunities for students to engage with resource-poor communities, internationally and domestically, as well as opportunities for students to discuss current topics in global health with leaders from many disciplines. The second focus is that the Global Health Collective gathers students together to discuss current global health events, participate in journal clubs, and organize citywide conferences. Students are encouraged to participate in any and all aspects and to take a leadership role on the Student Board. More information on the curriculum can be found [here](#).

Cornell Water Society

The Cornell Water Society is a student-run organization dedicated to public health outreach via the installation and promotion of clean water solutions in underserved communities in the U.S. and abroad. Our current flagship project, MAJI KWA AFYA ("Water for Health"), is a collaborative effort between current Weill Cornell Medicine students, the ASMK foundation of Shinyanga, W.S. Darley & Company, H2OpenDoors, and Rotary International to bring clean, reliable, and affordable drinking water to the people of the Busiya chiefdom in the Shinyanga region of western Tanzania. Our goal is to ensure sustainability of this and future projects through continued participation from Weill Cornell students, ensuring long-lasting safe drinking water for those who need it most.

Future of Care

The Future of Care: WCM Chapter is a student group interested in the development of new methods and technologies in order to improve healthcare and clinical practice. Our goals include (1) educating students and clinicians about technologies relevant to medical practice, (2) fostering technology entrepreneurship at Weill Cornell, (3) creating collaborations between inventors and clinicians within Weill Cornell and the greater NYC community. In conjunction with Future of Care NYC, we achieve these aims through hosting public conferences, skill workshops, and seminars.

Infectious Disease Interest Group

The main goals of IDIG are to provide information about careers in infectious diseases, present infectious disease talks/discussions, and facilitate interaction between WCMC students and infectious disease services at NYPH, MSK and HSS. We'd like for the group to be of interest for students pursuing any field. For this reason, we're planning to have talks/discussions of broad interest (eg. intersections between infectious diseases and psychiatry, surgery, etc.). Finally, we're considering the feasibility of community service projects, such as vaccination awareness/myth buster events etc.
